IV-D-42

Honorable William K. Reilly, Administrator  
Environmental Protection Agency  
401 M Street  
Washington, D.C. 20460

Dear Mr. Reilly:

Air pollution is a major problem in the metro areas of our state, and we are always ready to explore new ways to improve the quality of the air we breathe.

Some of my friends have briefed me on a gasoline performance additive called HiTEC 3000 which could significantly reduce automotive emissions.

I hope that EPA will approve the use of this fuel additive at the earliest possible time.

Sincerely,
